

DS10-12

Perimeter/Bottom Seal

Description

A curved fin seal gasket held within an aluminium carrier.

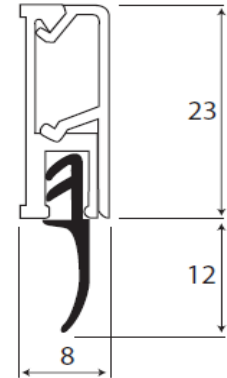

Features

This curved fin seal can compress under side or end pressure so it can be ideal for use in a range of sealing positions.

The black TPE-V seal gasket is strong and flexible due to its elastomeric properties.

A 100% aluminium carrier is screw fixed to the door, window or frame to securely hold the gasket seal in position.

The 23 x 8mm carrier has a curved edge and smooth surface profile which fully conceal the fixing screws.

Fitting Location

This seal can be fitted anywhere around the full perimeter of a door or window.

Gap Size

Maximum 12mm gap coverage if fitted as standard. Consider also adjusting the position of carrier.

Material and Finish

Black TPE-V gasket with clear anodised aluminium carrier and cover.

Fixing

Installed using the supplied fixing screw pack.

Approvals

Fire: AS1530.4

Smoke: AS1530.7/BCA C3.4

Acoustic: AS1191/ISO140.3/ISO10140.2
