

DS20-16

Perimeter/Bottom Seal

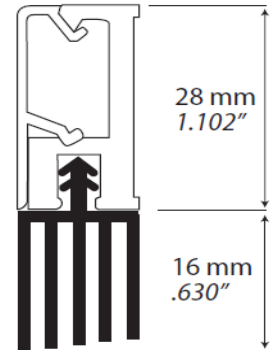

Description

A straight 5 fin seal gasket held within a straight aluminium carrier.

Features

This unique 5 straight fin seal has been designed for heavy duty sealing where the will swipe against the closing surface. The black TPE-V seal gasket material is strong and flexible due to its elastomeric properties. A 100% aluminium carrier is screw fixed to the door, window or frame to securely hold the gasket seal in position. The 28 x 13mm carrier has a curved edge and smooth surface profile which fully conceals the fixing screws.

Fitting Location

This seal can be fitted around the perimeter and/or bottom of a door or window.

Gap Size

Maximum 16mm gap coverage if fitted as standard. Consider also adjusting the position of carrier.

Material and Finish

Black TPE-V gasket with clear anodised aluminium carrier and cover.

Fixing

Installed using the supplied DSA screw pack.

Approvals

Fire: AS1530.4
Smoke: AS1530.7/BCA C3.4
