

GLASS BRUSH

Description

GLASS BRUSH is used to seal the floor to door gap of hinged or pivoting glass doors.

Features

The major advantage is that the polypropylene brush is always in contact to the floor, due to a self-regulating spring. Basic and elegant, this model can easily be fixed by a high-sealing tape. Available in different profile finishing, this product can be shortened on both sides.

Fitting Location

Fitted to the bottom of a frameless glass door, it includes a matching coverplate for the other side.

Gap Size

15mm maximum.

Material and Finish

The aluminium profile is available in a variety of finishes or stainless steel.

Fixing

Fixed with very high strength adhesive bond tape.

Available As

Various lengths available from 830mm to 1430mm
