

Threshold Plates and Ramps

Description

Fitted to the sill under the door, these provide an optimum flat floor sealing surface for bottom seals.

Features

They are hard anodised aluminium extrusions and when fitted, they provide a solution to excessive resistance often encountered with carpeted, uneven or sloping floors.

Fitting Location

Fitted to the sill at the foot of a doorway.

Material and Finish

Silver anodised aluminium. Black TPE-V gasket seal with DST77 and DST101
